

Application Information

Wire Printing

Read wire printing real time.

Two style stroboscopes available:

The DT-311A shows the flash rate or RPM of the print head and has the ability to adjust the phase angle while viewing the product. The DT-315A is a portable unit with similar features of the DT-311A except with an internal battery. It adds true portability.

For either Stroboscope, you can have many sensors installed on several lines. Simply plug the sensor in to the unit for spot checks. (requires ZZCN0002 Plug installed on each NPN sensor)

Accessories:

SAS-DT300 Swing arm positioner, SG-300 Rubber strobe guards, & Proximity Sensors

Equipment Used

- Stroboscope DT-311A or 315A. Proximity Sensor: Any NPN input type
